Black Irish Hair Mist

A warm odor similar to the Black Irish smell, mixed with ingredients that shine the hair and reduce frizz for the perfect final touch after styling.

Vision

To become an icon in authenticity by creating new combinations of fragrances and build communities of individuals in GCC and the middle east who believe in self-expression through fragrances by finding their unique scent that describes their mood. We aspire to empower individuals to embrace their individuality by experimenting with scents that fit their style and personality.

Mission

We strive to develop authentic, luxurious scents that go beyond the expectations of our customers, using the purest premium natural aromas and essences in different layers and notes to create fragrances with depth, harmony, and longevity inspired by the fragrant scents of the flowers in Keukenhof garden.

Expand Geographically

We intend to expand into GCC and Middle East in order to connect with new customers and boost brand awareness. Our ongoing market research is critical to recognizing cultural differences and establishing a strong presence that is relevant to the communities.

E-commerce

We concentrate mostly on e-commerce as it provides a convenient and accessible route for customers to purchase our fragrances online via a user-friendly website, as well as digital marketing campaigns to acquire new customers as well as retain existing ones.

Events and Exhibitions

We extend our presence by participating in events and exhibitions in order to increase brand awareness and instant sales by creating a unique and memorable experience.
